

Pablo Trik Marín Junior Trainee

I'm a first-year student of Technological Baccaureate and I'm actively seeking employment opportunities to both save money and gain valuable experience.

I look forward to studying Mathematics or Computer Science at the Universitat Politècnica de Catalunya (UPC).

I'm in search of a motivating job proposal. I'm unafraid to get my hands dirty and I'm hardworking. My approach to situations is pragmatic, and I prioritize transparent and productive communication.

Additionally, I have a keen interest in technological research projects and I'm committed to self-improvement across various domains such as exercise, meditation, compose music, and the study of economics.
