

# PABLO MARÍN Junior Trainee dev

I look forward to study mathematics or computer science at the UPC in Barcelona. At the moment I'm studying for selectivity and I'm looking for a job that allows me to save money and gain experience.

I am looking for a motivating proposal. I'm not afraid to get my hands dirty, I'm hardworking. I always approach problems pragmatically and try to have transparent and productive communication.

I like working on technological research projects as well as improving myself in all aspects, exercising, meditating, making music, studying economics...
